## Activity Guide

Pattern Dance .....	1
Cube Illusion .....	2-4
Tiny Treker You Bookmark .....	5-6
Homemade Compass .....	7-8

### ***PARTICIPATE!***

Write a postcard to Zach! Draw a picture of your favorite travel destination and write a message telling him about your favorite things to do there.

*Camp TV* is a production of The WNET Group.

Major funding for *Camp TV* is provided by the Corporation for Public Broadcasting. Additional funding is provided by The Peter G. Peterson and Joan Ganz Cooney Fund and the Pine Tree Foundation of New York.

## Pattern Dance

### **Instructions:**

**1. Choose a dance move and a number. For instance, if you choose “kick” and the number 3, then the first part of the dance pattern would be 3 kicks.**

**2. Next, have your partner choose another dance move and another number. Take turns going back and forth at least two more times to add more moves to your pattern.**

**3. It’s time to put the whole thing to the test! Turn on some music and do your entire dance from the beginning. Once you’ve finished your pattern one time, repeat it as many times as it takes to get through the entire song.**

## Cube Illusion

### Materials List:

- ruler
- paper
- pencils
- fishing line
- scissors or a craft blade
- clear tape
- pipe clearers
- thumbtack
- shoebox

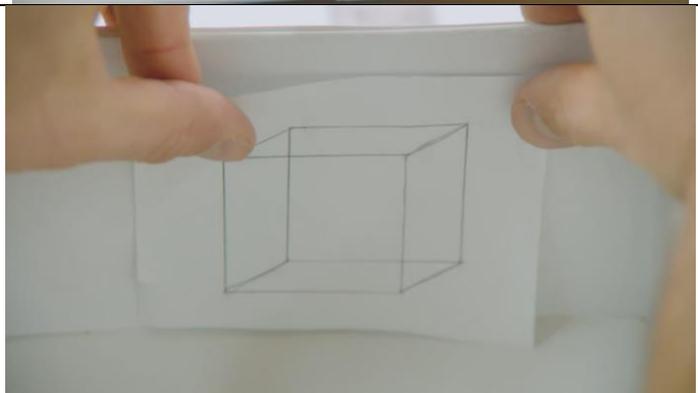

**\*This activity should be done with the help of a trusted adult\***

### Instructions:

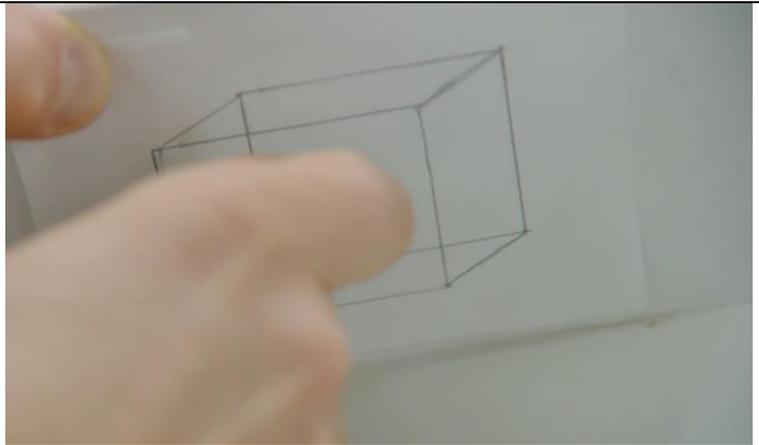

**1. Cut a square hole in the middle of the bottom of the box. Cover with tape on both sides.**

**2. On a sheet of paper, draw a cube that fits inside the box. Tape the picture on the back wall of the box so that you can see it through the window you made.**

**3. Use a push pin to poke holes through the corners of the cube.**

**4. Staying very still, look through the window and use the push pin to poke holes through the window that line up with the 8 holes you made in the back of the box.**

**5. Remove the picture of the cube. String fishing line from one hole in the back of the box to the matching hole on the other side. Pull tight and secure with tape.**

**6. Connect 2 of the fishing line stings with a pipe cleaner to create a line. By eye, continue to use pipe cleaners to draw the lines of the cube. Use pipe cleaners of different lengths so they are spread out through the whole box.**

**7. After you add all the lines of the cube with pipe cleaners, check out your cube through the window of your box.**

## Tiny Treker You Bookmark

### *Materials List:*

- a fun photo of yourself
- scissors
- hole punch
- ribbon or a tassel
- clear packing tape

### ***Instructions:***

**1. Take a photo of yourself posing like you are holding a rope or floating away. Make sure your arms are above your head and your hands form a fist. Print out the photo.**

**2. Lay a long piece of tape on the table. It should be long enough to fold over the picture and cover it entirely. Place your photo in the middle of the tape and carefully fold the tape over your photo. Slowly walk your fingers over the tape to smooth it down.**

**3. Carefully cut yourself out.**

**4. Use a hole punch to make a hole at your hands. String ribbon or a tassel through the hole. Now you have a tiny trekker you!**

## Make Your Own Compass

### Materials List:

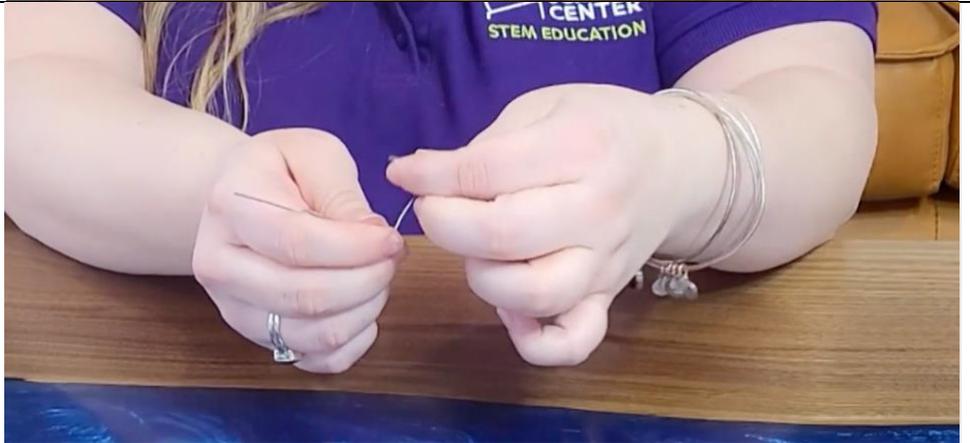

- magnet
- paperclip
- bowl filled with water
- Styrofoam cup
- scissors
- tape
- permanent marker

### Instructions:

**1. Carefully cut off the bottom of your Styrofoam cup. Place the bottom aside.**

**2. With the help of an adult, carefully unfold and straighten your paper clip.**

**3. Rub your magnet against one side of the straightened paper clip. Make sure that you are always rubbing in the same direction, never back and forth. Do this for about 30 seconds, or 50 strokes.**

**4. Tape your paperclip needle to the bottom of the Styrofoam cup bottom.**

**5. Float your homemade compass in a bowl of water. Watch it rotate. When it starts to settle and finally stops, you'll know that your compass has found north!**
